Documentation

Description

This API allows systems to validate KRA issued Tax Compliance Certificates.

📌 Overview

To successfully invoke this API, you must first generate an **access token** via the Authorization API. This token must be included as a Bearer token in the Authorization header of your API request.

This guide includes:

- How to generate the access token
- How to use the token in the API request
- Request/response examples
- Error handling
- Sample data section for testing
